

Prof. Marie-Madeleine Dolmans

Marie-Madeleine Dolmans earned her medical degree from the Université Catholique de Louvain in Brussels in 2000, and her PhD degree on “Cryopreservation and transplantation of human ovarian tissue” in 2006. She completed her internship in Gynecology and Obstetrics in 2007 and since then has divided her time equally between clinical and research activities. Her research work focuses primarily on human ovarian follicle isolation and xenotransplantation, and the risk of reimplanting malignant disease. She succeeded Prof. Donnez as Head of the Gynecology Research Unit at the Université Catholique de Louvain in October 2012.
