

**Mark Kilby, Professor of Fetal Medicine, Birmingham Women's & Children's Foundation Trust / University of Birmingham.**

**Biography:** Holds the Dame Hilda Lloyd Chair of Fetal Medicine and has been a Professor at the University of Birmingham since 2003. He is lead clinician & Director of the Fetal Medicine Centre at Birmingham Women's & Children's Foundation Trust.

- 1.MB BS Guys Hospital Medical School, London. 1984.
- 2.MD (Doctor of Medicine). University of Nottingham. 1990.
- 3.MRCOG. 1991.
- 4.FRCOG. 2007.
- 5.DSc (Doctor of Science). University of Birmingham. 2011.
- 6.FRCPI. Dublin. 2015.

Professor Kilby continued his general training in Obstetrics and Gynaecology and after a research sabbatical at the University of Toronto in Canada he obtained general accreditation in Obstetrics and Gynaecology from the Royal College of Obstetricians and Gynaecologists in 1995. He then underwent a period of further subspecialist training, principally in Birmingham, to obtain full subspecialty accreditation in Maternal and Fetal Medicine in 1996.

He is fully registered with the GMC (2926274) and obtained full revalidation in 2014. He is on the General Medical Council Register for Obstetrics and Gynaecology and also the Specialist Register for Maternal and Fetal Medicine.

Professor Kilby is a senior Consultant and one of six accredited subspecialists providing regional and supra-regional care in Maternal and Fetal Medicine to pregnant women in the West Midlands and regions of the Midlands and North England. The West Midlands Fetal Medicine Centre at the Birmingham Women's Hospital has a catchment area covering a population of over 10 million people and therefore provides a large referral base for an extensive number of tertiary referral opinions including those with complex multiple pregnancies.

Professor Kilby's clinical expertise relates to prenatal diagnosis, the detection of fetal abnormalities and also fetal therapy; in particular the management of complicated monochorionic twins.

He has published over 350 peer reviewed original articles, chapters for books and review articles on topics relating to clinical Fetal Medicine and the basic science surrounding the pathophysiology of disease affecting both the mother and the baby. Over 350 publications. h-index of 57; i10 index of 161 and RG score of 53.7. All cited on pubmed <http://www.ncbi.nlm.nih.gov/pubmed?term=kilby%20M>. He was elected as an Executive Member of the British Maternal and Fetal Medicine Society (BMFMS) in 2000 and served until 2007. He was subsequently re-elected in 2008 as the Research Representative for this Society and then in 2011 was elected President of the Society (serving from 2011 to 2014).

He is an invited Member of the International Fetoscopic Working Group (elected 2005) and an elected Member of the North American Perinatal Research Society (elected 2004).

He chaired the NICE Working Party on Multiple Pregnancy from 2008 to 2011 and was also a co-author on the RCOG Green Top Guideline on the Management of Monochorionic Twins (version one 2008 and subsequently the revision published in November 2016).

He has previously been a Member of Council of the Royal College of Obstetricians and Gynaecologists as a Members Representative for the West Midlands (from 2001 to 2004) and was elected as a Fellow of the Royal College of Obstetricians and Gynaecologists in 2007 and is now the elected Fellows Representative for the West Midlands region on this Council (2001 to 2017). He has served on the Subspecialty Training Committee at the Royal College of Obstetricians and Gynaecologists between 1997 and 2003 and was appointed as the Chairman of this Committee in 2016. He is the past Chairman of the Wellbeing of Women Research Advisory Committee from 2008 (for which he served for 5 years) and was the convenor and senior editor of the RCOG 50th Scientific Working Party on Multiple Pregnancy published in 2006.

Professor Kilby is one of two subspecialty practitioners performing fetoscopic laser ablation and other invasive fetal therapeutic treatments for the management of complex monochorionic twins. As already mentioned, he receives referrals from all over the North of England and the Midlands and the Centre performs 50 to 60 fetoscopic laser ablations per annum.
