

Dr. Rebekah Zimmerman completed her genetics fellowship at Harvard Medical School and is board certified by the American Board of Medical Genetics and Genomics in Clinical Molecular Genetics. She has spent several years developing molecular diagnostic tests for cardiomyopathies, inherited cancers and expanded carrier screening. Most recently she was the Laboratory Director of the CLIA-certified PGD laboratory at the Foundation for Embryonic Competence (FEC) in New Jersey. Dr. Zimmerman took her experience in high throughput expanded carrier screening to further advance the SGD testing at the FEC in an effort to better help the families who are trying to increase their chances of having a healthy baby. Her work on SGD PGD was recently recognized as a Seminal Contribution paper in Fertility and Sterility.
