

CV Irma Virant-Klun

Professor Irma Virant-Klun completed her studies in biology and medicine, and is the Head of a very busy In Vitro Fertilization Lab at the University Medical Centre Ljubljana. She is deeply involved in the clinical program of in vitro fertilization and research of different aspects of reproductive biology, from gamete biology (including oocyte proteomics) to ovarian stem cells. She is a Professor of Medical Cell Biology at the Faculty of Medicine, University of Ljubljana, and an author of many publications on the subject.
