

Short c.v. for Roger Gosden, Ph.D., D.Sc.

Roger Gosden's career in reproductive science began in Cambridge, England, under Robert Edwards in 1970. He has built and directed research teams with special interests in oocyte development and fertility preservation in England, Scotland, Canada, and the USA, authoring several books and numerous papers and was sometime an international conference organizer. He has retired from the laboratory but remains active as a writer and university teacher based in Williamsburg, Virginia, married to the embryologist Lucinda Veeck.
